Abstract

This bibliography presents a compilation of both scientific and popular references relating to Lake Victoria. Comprising 2,180 bibliographic entries, it covers all disciplines ever concerned with Lake Victoria, but gives emphasis to fish and fisheries. It represents an attempt to take stock of available works, investigations and issues to enable users to make full use of the information they contain, for proper management of the fisheries of Lake Victoria.

Background

The present bibliography results from merging two drafts bibliographies prepared in 1988 and 1989. Overlapping references were deleted and all entries were rechecked where discrepancies were found between two corresponding references. No attempt was made to delete the 'non-aquatic' references. New references covering the late 1980s and early 1990s were collected by the first author and added to the bibliography of which a draft version was ready in 1993 (Crul *et al.* 1993). The bibliography will undoubtedly be a useful tool in addressing sustainable resource use and management of Lake Victoria. Therefore the Division of Water Sciences of UNESCO decided within the framework of its project 'Comprehensive and Comparative Study of Great Lakes' (UNESCO/IHP-IV Project M-5.1, 1992-1995) to publish the bibliography separately in UNESCO's series of 'Technical Documents in Hydrology'.

In early 1988 the Haplochromis Ecology Survey Team (HEST) of the University of Leiden, The Netherlands, commenced preparations for a regional seminar on the fish stocks and fisheries of Lake Victoria which was subsequently held in January and February 1989 as part of their project with the Tanzanian Fisheries Research Institute (TAFIRI) in Mwanza. During these preparations it was recognized that the seminar would greatly benefit from a review of the literature potentially relevant to fisheries of Lake Victoria.

Drs R.C.M. Crul and G. Bongers, then based at the International Agricultural Centre, Wageningen, Drs M.J.P. van Oijen of the Rijksmuseum van Natuurlijke Historie, Leiden and Ir D.J. Postma, then member of HEST, Leiden, compiled large numbers of references covering beside fisheries and fish ecology other aspects such as limnology, geology, geography, hydrology, sociology etc. through literature searches at the libraries of their institutes in Leiden and Wageningen which they sent to specialists for checking and complementing (see Acknowledgements). This work led to the preliminary bibliography by Crul *et al.* (1988).

Starting from May 1988, during a visit of Mr. Acere to the Philippines, a large number of references were simultaneously assembled in Manila in the frame of the "Artisanal Fisheries Resources Study Project No. 5100.36.47.025 Uganda" funded by the Commission of the European Community and jointly implemented by the Uganda Freshwater Fisheries Research Organization (UFFRO), Jinja, and the International Center for Living Aquatic Resources Management (ICLARM), Manila. References were obtained from the ICLARM library, from ASFA, BIOSIS Previews, CAB Abstracts, AGRICOLA, and personal collections of FAO staff. The bibliography, as originally conceived, was meant to cover the fishery resources and fisheries of Lake Victoria. As the search proceeded, however, references covering other aspects (e.g., geology, hydrology, epidemiology, geography, paleoclimatology, etc.) emerged. This work led to the preliminary bibliography of Acere *et al.* (1989).

Acknowledgements

Messrs. R.C.M. Crul, G. Bongers, M.J.P. van Oijen and D.J. Postma wish to thank the following experts and colleagues for their contribution to this bibliography: G.P. Baerends, C.D.N. Barel, J. Bon, E. Coenen, G. Fryer, M. Geerts, P.T. Goldschmidt, L. Gram, D.F. Gréboval, P.H. Greenwood, R.J.C. Hoogerhoud, G. Howes, N. Hughes, L.F. Khalil, A.W. Kudhongania, R.H. Lowe-McConnell, P. Verheyen, W.L.T. van Densen, W. Wilhelm, W. de Winter and F. Witte. They also wish to acknowledge the support of the section for Research and Technology of the Netherlands Ministry of Development Cooperation and the Netherlands Foundation for the Advancement of Tropical Research (WOTRO).

Messrs. T.O. Acere and G. Silvestre wish to thank the staff of the FAO Fisheries Department, especially F. Henderson, T. Petr, G. Ssentongo, S. Venema, R. Welcomme and D. Pauly of ICLARM, for their assistance in identifying suitable materials and supplying items from their own personal collection. They are grateful to Ma. Theresa Cruz, Susan Luna, Domingo Ochavillo and especially Sandra Gayosa for standardizing, and/or inputting the reference entries.
